WORK EXPERIENCE

Software Engineer Aug 2025 – Present
Intervue.io *Bangalore, IN*

- **Led and executed two zero-downtime production releases** using a **blue-green deployment strategy**, ensuring uninterrupted service during major feature rollouts.
- **Designed isolation mechanisms for shared AWS SQS queues** across parallel production environments, preventing cross-environment message contamination and eliminating unintended internal communications.
- **Architected event-driven asynchronous workflows** using **Node.js, PostgreSQL, Redis, and AWS SQS**, maintaining 100% production uptime across deployments.
- **Built a visual email template editor** with dynamic placeholder injection (e.g., candidateName, interviewName) and real-time preview capabilities, enabling customizable, data-driven communication workflows.
- **Onboarded and mentored interns and new engineers (including senior developers)** by assisting with repository setup, explaining system workflows, and reinforcing code practices for effective collaboration.

Integration Developer Intern Jan 2025 – Jun 2025
Seagate Technology *Pune, IN*

- **Engineered a Python automation tool** to cross-validate vendor attendance data and enhanced backend modules within a **Java EE/Spring Boot** HR portal, improving discrepancy detection and system maintainability.
- **Refactored and maintained 5+ enterprise integrations** on **Boomi**, including critical updates for **SuccessFactors Onboarding 2.0**

Full-Stack Web Developer Jan 2024 – Jun 2024
Omega Orion *Remote, IN*

- **Architected and launched** a full-scale employee management portal from scratch, designing relational schemas with **Prisma** and building scalable **Node.js/Express** REST APIs.
- **Developed a responsive, state-driven frontend architecture** using **React and Material UI**, optimizing component rendering and improving overall system efficiency.

EDUCATION

B.Tech in Computer Science & Engineering (AI) Nov 2021 – Jul 2025
Bhilai Institute of Technology Durg *CPI: 8.42*

12th Grade Jul 2021
Central Board of Secondary Education *91%*

ACHIEVEMENTS

- **Winner – Smart India Hackathon 2024 (Software Edition)** at IIT KGP for building a Multi Antivirus Utility Tool integrating multiple open-source engines.
- Finalist – Smart India Hackathon 2023 (Software Edition), ranked among top teams nationally.

TECHNICAL SKILLS

- **Backend & Distributed Systems:** Node.js, AWS, Redis, GraphQL, Event-Driven Workflows
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Languages:** TypeScript, JavaScript, Java, Python
- **Frontend Architecture:** React.js, Next.js, Redux, Tailwind, Zustand, Material UI, Untitled UI
- **Integration:** Dell Boomi, SAP SuccessFactors, SharePoint Graph API

PROJECTS

Multi Antivirus Utility Tool | *Tauri, Rust, React, Cybersecurity* GitHub

- Engineered a cross-platform malware detection tool integrating **4 open-source antivirus engines** with parallel processing.
- Built a **Rust-powered backend** for secure file handling and parallel scan orchestration.
- Developed a **React-based GUI** with real-time scan updates and system-level controls using Tauri.

3D Collaborative Studio | *React, Three.js, Socket.IO, Micro-Frontend Architecture* GitHub | Demo

- Built a real-time collaborative 3D workspace using **Three.js** and **Socket.IO**, enabling synchronized object manipulation and state updates across multiple clients.
- Designed a modular micro-frontend architecture to isolate rendering logic and collaboration layers, ensuring scalable feature integration and efficient event propagation.
